Jim Damkowitch, Principal and Managing Director of DKS Sacramento

Jim brings over 30 years transportation-air quality planning/modeling experience to his role at DKS. Jim has served as project manager for travel demand model development for Caltrans, regional and local agencies. He has 15 years of MPO/RTPA transportation planning experience focused on the technical modeling requirements for transportation-air quality conformity and on-road mobile source emission inventory development. As a consultant, Jim has specialized in performance-based planning through the development and quantification of multi-modal performance measures. He has also served on state/regional committees and conference panels for transportation air quality conformity, performance measurement, and SB 743.
